

GURUKASHIUNIVERSITY

**Master of Science in Agriculture
(Fruit Science) (FSC)
Session:2025-26
Faculty of Agriculture**

Graduate Attributes of the Programme: -

Type of learning outcomes	The Learning Outcomes Descriptors
Graduates should be able to demonstrate the acquisition of:	
Learning outcomes that are specific to disciplinary/interdisciplinary areas of learning	Provide knowledge of economic importance, cultivation practices of temperate, tropical, sub-tropical and dry land fruit crops.
Generic learning outcomes	Impart a deep insight of nutrition, canopy, plant physiology, disease and insect pest management; determination and identification of nutrient from soil and plant in order to assess deficiencies and toxicity; plant protection measures, utilization of different structures such as poly and greenhouses to enhance crop yield in orchards; water requirement of different fruit crops.

Programme Learning outcomes: A Postgraduate Certificate is awarded to students who have demonstrated the achievement of the outcomes located at level 6.0:

Element of the Descriptor	Programme learning outcomes relating to Undergraduate Certificate
The graduates should be able to demonstrate the acquisition of:	
Knowledge and Understanding	Study the climatic requirements of various fruit crops of Temperate, Tropical and Sub-tropical regions of India. Besides, their economic importance, uses, distribution, varieties and propagation techniques.
General, technical and professional skills required to perform and accomplish tasks	Pursue analysis of symptoms and disorders preceded by their dearth along with physiological role in fruit plants.
Application of knowledge and skills	Provide acquaintance regarding methodology for fruit harvesting, harvest indices, grading for specific market and influences of pre-harvest practice on marketing of fruit crops.
Generic learning Outcomes	Develop strong generic learning outcomes, including critical thinking, effective communication, and problem-solving skills. They will be equipped to analyze complex

	issues in horticulture and apply scientific knowledge in practical settings.																		
Constitutional, humanistic, ethical, and moral values	Demonstrate a strong commitment to constitutional, humanistic, ethical, and moral values. They will uphold principles of equality, justice, and sustainability in agricultural practices. The program instills a deep respect for farmers' rights, environmental stewardship, and community well-being. Ethical decision-making and integrity will guide their professional and research activities.																		
Employability and job-ready skills, and entrepreneurship skills and capabilities/qualities and mindset	The Master's in Fruit Science program equips graduates with advanced technical and research skills for careers in horticulture, agribusiness, and research. It fosters job-ready skills like communication, teamwork, and precision agriculture expertise. The program cultivates an entrepreneurial mindset, enabling innovation, risk management, and sustainable fruit-based ventures.

CBCS(ChoiceBasedCreditSystem)

Semester-I

Course Title: Sub-Tropical and Temperate Fruit Production
Course Code: FSC501

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Get familiarized with the basic knowledge of importance, uses, origin, distribution, area and production of subtropical and temperate fruits.
2. Acquire technical know-how regarding soil, climatic, water quality, biotic/abiotic factors limiting fruit production.
3. Learn the importance and methods of planting, rootstock, propagation, fertigation and irrigation, nutrient and water management. Establish the methodology of training, pruning, quality improvement, pollination, fruit set and plant protection of subtropical and temperate fruits.

Course content (Theory)

Origin, distribution, commercial importance and export potential. Eco-physiological requirements. Species and varieties. Rootstocks and propagation. Planting, root zone, training and pruning. Nutrition and water requirements, fertigation, role of bio-regulators, major pests, diseases, physiological disorders and their control measures. Abiotic factors limiting fruit production. Flowering, pollination and fruit set. Quality improvement. Storage and ripening techniques. Industrial and export potential, Agri. Export Zones (AEZ) and industrial support.

Unit I**8 hours**

Fruit Crops-Apple, Pear, Quince, Plum, Peach, Cherries, Apricot

Unit II**7 hours**

Fruit Crops-Grapes, Hazelnut, Litchi, Loquat, Persimmon.

Unit III**7 hours**

FruitCrops-Kiwifruit, Strawberry, Walnut, Almond, Pistachio, Pecan.

UnitIV

8hours

FruitCrops–Mangosteen, Carambola, Bael, Woodapple, Fig, Jamun, Rambutan and Pomegranate.

TransactionMode

Lecture, MobileTeaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Canopy Management in Fruit Crops

Course Code: FSC503

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Understand the basic principles of canopy management to modify plant architecture
2. Inculcate skills on training and pruning of fruit crops, and growth regulation.

Comprehend about canopy management, training through root stocks, pruning, training management practices and land use, spacing, utilization, light interception, flowering and fruiting of important fruit crop.
 Compose the importance of spacing and use of land area.

Course content (Theory)

Unit I

8 hours

Introduction, Types and Classification: Canopy management – importance and factors affecting canopy development. Canopy types and structures, canopy manipulation for optimum utilization of light and its interception.

Unit II

8 hours

Spacing and utilization of land area – Canopy classification. Physical Manipulation and Growth Regulation: Canopy management through rootstock and scion.

Unit III

7 hours

Canopy management through plant growth regulators, training and pruning and management practices.

Unit IV

7 hours

Canopy development and management in relation to growth, flowering, fruiting and fruit quality.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Organic Fruit Culture

L	T	P	Credits
1	0	0	1

Course Code: FSC505**Total Hours-15**

Learning Outcomes: After completion of this course, the learner will be able to:

1. Study the different types of soil and its management for fruit crops and effect of soil organic matter on physicochemical characteristics of soils.
2. Familiarize with the concepts and practices of organic and other natural farming systems.
3. Generate know-how on procedures, policies and regulation for inspection and certification of organic produce
4. Construct the basic and advanced of organic farming practices and its management.

Course content (Theory)**Unit I****4 hours**

Principles and Current Scenario: Organic horticulture, scope, area, production and world trade, definition, principles, methods and SWOT analysis.

Unit II**4 hours**

Farming System and Practices: Organic farming systems including biodynamic farming, natural farming, home organic farming, rishikrishi, EM technology, cosmic farming; on-farm and off-farm production of organic inputs.

Unit III**4 hours**

Role of bio-fertilizers, bio enhancers, legumes, inter cropping, cover crops, green manuring, zero tillage, mulching and their role in organic nutrition management.

Unit IV**3 hours**

Organic seeds and planting materials, soil health management in organic

production, weed management practices in organic farming, biological management of pests and diseases, trap crops, quality improvement in organic production of fruit crops.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Sub-Tropical and Temperate Fruit Production lab
Course Code: FSC502

L	T	P	Credits
0	0	2	1

Course content (Practical) Total Hours-30

1. Distinguished features of fruit species, cultivars and rootstocks.
2. Demonstration of planting systems, training and pruning.
3. Hands-on practices on pollination and crop regulation.
4. Physiological disorders - malady diagnosis.
5. Physico-chemical analysis of fruit quality attributes.
6. Field/Exposure visit to subtropical and temperate orchards.
7. Project preparation for establishing commercial orchards.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Canopy Management in Fruit Crops Lab
Course Code: FSC504

L	T	P	Credits
0	0	2	1

Course content (Practical)

Total Hours-30

1. Study of different types of canopies.
2. Training of plants for different canopy types.
3. Canopy development through pruning.
4. Understanding bearing behavior and canopy management in different fruits.
5. Use of plant growth regulators.
6. Geometry of planting.
7. Development of effective canopy with support system.
8. Study on effect of different canopy types on production and quality of fruits.

Transaction Mode

Course Title: Commercial Production of Cut Flowers

Course Code: FSC507

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Establish understanding of production and post-harvest management of flower crops.
2. Acquire the required skills to prepare project reports on different crops for financing.
3. Know about the preparation of land and nursery raising technique for cut flower crops for raising quality and disease-free seedlings.
4. Recommend the use of growth regulators, physiological disorders and remedies, IPM and IDM.

Course Content (Theory)

Scope and scenario: National and International scenario, importance and scope of cut flower trade, constraints for cut flower production in India. Growing environment: Soil analysis, soil health card, growing environment, open cultivation, protected cultivation, soil/ media requirements, land preparation, planting methods, influence of light, temperature, moisture, humidity and microclimate management on growth and flowering. Crop management: Commercial Flower production – Commercial varieties, water and nutrient management, fertigation, weed management, crop specific practices, ratooning, training and pruning, pinching, deshooking, bending, desuckering, disbudding. Use of growth regulators, physiological disorders and remedies, IPM and IDM. Flower regulation: Flower forcing and year-round/ offseason flower production through physiological interventions, chemical regulation, environmental manipulation.

Unit I

8 hours

Flower crops - Rose, Chrysanthemum, Gladiolus, Gerbera, Orchids,

Unit II

7 hours

Flowercrops-Tuberose, Carnation, Lilium, Anthurium, China aster.

Unit III

7 hours

Flowercrops-Alstroemeria,Birdofparadise,Heliconia,Solidago,Limonium,

UnitIV

8hours

Flowercrops-Alpinia,Ornamentalginger,
Dahlia,Gypsophila,stock,Cutgreens and Fillers.

TransactionMode

Lecture,MobileTeaching,Self-
Learning,CollaborativeLearningandCooperative Learning

Course Title: Production of cool Season Vegetable Crops
Technology
Course Code: VSC501

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

- 1 Identify deficiency symptoms of nutrients in cool season vegetable crops.
- 2 Acquaint with cool season vegetable crops growing in a vegetable garden, their cultural practices and identification.
- 3 Know about the preparation of land for cultivation of cool season vegetable Crops
- 4 Gain knowledge about innovative nursery raising technique for cool season vegetable crops for raising quality and disease-free seedlings

Course Content(Theory)

Introduction, commercial and nutritional importance, origin and distribution, botany and taxonomy, area, production, productivity and constraints, soil requirements, climatic factors for yield and quality, commercial varieties/ hybrids, seed rate and seed treatment, raising of nursery, sowing/ planting time and methods, hydroponics, precision farming, cropping system, nutritional including micronutrients and irrigation requirements, intercultural operations, special horticultural practices, weed control, mulching, role of plant growth regulators, physiological disorders, maturity indices, harvesting, yield, post-harvest management (grading, packaging and marketing), pest and disease management and production economics of crops.

Unit I

7 Hours

Bulbandtubercrops—Onion,garlicandpotato

Unit II

7 Hours

Rootcrops—Carrot, radish, turnip and beetroot.

Unit III

8 Hours

Colecrops—Cabbage, cauliflower, kohlrabi, broccoli,
Brussels sprouts and kale

Unit IV

8 Hours

Peas and beans—Peas and broad bean.

Leafy vegetables—Beet leaf, fenugreek, coriander and lettuce.

Transaction Mode

Lecture, Mobile Teaching, Self-

Learning, Collaborative Learning and Cooperative Learning

Course Title: Production of cool Season Vegetable Crops
Technology
Course Code: VSC502

L	T	P	Credits
0	0	2	1

Course Content (Practical)

Total Hours-30

1. Scientific raising of nursery and seed treatment.
2. Sowing and transplanting.
3. Description of commercial varieties and hybrids.
4. Demonstration on methods of irrigation, fertilizers and micronutrients application.
5. Mulching practices, weed management.
6. Use of plant growth substances in cool season vegetable crops.
7. Study of nutritional and physiological disorders.
8. Studies on hydroponics and other soilless culture.
9. Identification of important pests and diseases and their control.
10. Preparation of cropping scheme for commercial farms.
11. Visit to commercial farm, protected structure.
12. Visit to vegetable market.
13. Analysis of benefit to cost ratio.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Agriculture Statistics

Course Code: STAT501

L	T	P	Credits
3	0	0	3

Total Hours-45

Learning Outcomes: After completion of this course, the learner will be able to:

1. Understand the application of statistical methods in all the areas of experimental work and they have a very important role in agriculture.

Acquire knowledge regarding requirement at the national level and farm level for agriculture policy making, decision making, agriculture development and estimates agriculture and national income.

Apply statistics in areas of agriculture. One of the most important is to ascertain the volume of crop that needs to be produced based on output and demand of previous year.

4. Generalize land utilization and irrigation including the net area sown, gross cultivated area, current fallow, and cultivable waste.

Course Content (Theory)

Unit I

10 hours

Frequency distribution, standard error and deviation, correlation and regression analyses, co-efficient of variation; Hypothesis testing.

Unit II

15 hours

Concept of p-value. Tests of significance-t, F and chi-square (χ^2); Data transformation and missing plot techniques.

UnitIII**15hours**

Design of experiments and their basic principles, completely randomized, randomized block, split plot, strip-plot, factorial and simple confounding designs; Efficiency of designs.

UnitIV**5hours**

Methodsofstatisticalanalysisforcroppingsystemsincludingintercropping;pooled analysis.

TransactionMode

Lecture, MobileTeaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Library and Information services lab
Course Code: PGC501

L	T	P	Credits
0	0	4	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Identify library services and availability of resources in order to develop a realistic overall plan for research
2. Use general information resources to increase familiarity with the topic and disciplinary vocabulary
Learn about the research topic, question or the thesis to achieve a manageable
3. focus appropriate to the assignment criteria, available resources, and evidence needed to support thesis
4. Identify keywords, synonyms and related terms in order to flexibly

Course Content

1. Introduction to Library and its services; five laws of library science; type of documents;
2. Classification and cataloguing; organization of documents;
3. Sources of information primary, secondary and tertiary;
4. Current awareness and SDI services; tracing information from reference sources;
5. Library survey; preparation of bibliography; use of Online Public Access Catalogue;
6. Use of CD-ROM databases and other computerized library services, CeRA,

7. J-Gate; use of Internet including search engines and its resources; e-resources.

Suggested readings:

- Gita, S. 2012. *Library and Information Services*. LAP Lambert Academic Publishing. USA. pp. 76.

Course Title: Agricultural Research, Research Ethics and Rural Development Programmes

Course Code: PGC502

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: After completion of this course, the learner will be able to:

1. To enlighten the students about the organization and functioning of agricultural research systems at national and international levels
2. To aware the students about research ethics, and rural development programmes and policies of Government.
3. Acquire knowledge on Concept and connotations of rural development
4. Constraints in implementation of rural policies and programmes

UNIT-I

3 Hours

History of agriculture in brief; Global agricultural research system: need, scope, opportunities; Role in promoting food security, reducing poverty and protecting the environment; National Agricultural Research Systems (NARS) and Regional Agricultural Research Institutions; Consultative Group on International Agricultural Research (CGIAR)

UNIT-II

4 Hours

Research ethics: research integrity, research safety in laboratories, welfare of animals used in research, computer ethics, standards and problems in research ethics. International Agricultural Research Centres (IARC), partnership with NARS, role as a partner in the global agricultural research system, strengthening capacities at national and regional levels;

UNIT-III

4 Hours

International fellowships for scientific mobility. Concept and connotations of rural development, rural development policies and strategies. Rural development programmes: Community Development Programme, Intensive Agricultural District Programme, Special group – Area Specific Programme.

UNIT-IV

4 Hours

Integrated Rural Development Programme (IRDP) Panchayati Raj Institutions,

Cooperatives, Voluntary Agencies/Non-Governmental Organisations. Critical evaluation of rural development policies and programmes. Constraints in implementation of rural policies and programmes.

Transaction Mode:

Lecture, Seminar, Peer Group Discussion, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Reading

1. Bhalla GS & Singh G. 2001. *Indian Agriculture-Four Decades of Development*. Sage Publ.
2. Punia MS. *Manual on International Research and Research Ethics*. CCS, Haryana Agricultural University, Hisar.
3. Rao BSV. 2007. *Rural Development Strategies and Role of Institutions-Issues, Innovations and Initiatives*. Mittal Publ.
4. Singh K. 1998. *Rural Development -Principles, Policies and Management*. Sage Publ.

Course Title: Master Research

Course Code: FSC500

L	T	P	Credits
NA	NA	NA	2

Learning Outcomes: On successful completion of this course, the student will be able to:

1. Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques.
2. Familiarize with Negotiate, plan, design and execute a research-based project.
3. Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format.
4. Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of plant pathology experiments.

Semester-II**Course Title: Tropical Fruit Production****Course Code: FSC551**

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Equip themselves with know-how on agro-techniques for establishment and management of an orchard leading to optimum and quality fruit production of tropical fruits.
2. Learn the importance and identification of different agro-export zones for fruit crops.
3. Evaluate the importance of flowering, pollination, fruit set and fruiting and harvesting of tropical fruit crops.
4. Develop knowledge of storage, marketing, post-harvest technology with know-how of export and industrial potential.

Course Content (Theory)

Importance and Background: Importance, origin and distribution, major species, rootstocks and commercial varieties of regional, national and international importance, eco-physiological requirements. Propagation, Planting and Orchard Floor Management: Asexual and sexual methods of propagation, planting systems and planting densities, training and pruning methods, rejuvenation, intercropping, nutrient management, water management, fertigation, use of bio-fertilizers, role of bio-regulators, abiotic factors limiting fruit production. Flowering, Fruit-Set and Harvesting: Physiology of flowering, pollination management, fruit set and development, physiological disorders – causes and remedies, crop regulation, quality improvement by management practices; maturity indices, harvesting, grading, packing, storage and ripening techniques; insect and disease management.

Unit I**8 hours**

Fruitcrops-Citrus, Mango, Papaya, Pineapple.

Unit II

7 hours

Fruitcrops-Banana, Avocado, Sapota, Guava.

Unit III**7 hours**

Fruitcrops-Ber,Amla,Jackfruit,Custardapple.

Unit IV**8 hours**

Fruitcrops-MinorTropicalFruitcrops.

Transaction Mode

Lecture, Mobile Teaching, Self-

Learning, Collaborative Learning and Cooperative Learning

Course Title: Breeding of Fruit Crops**Course Code: FSC553**

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Learn the importance of origin, distribution, genetic resource, gene banks and taxonomic status of fruit crop species and varieties.
2. Study the blossom biology and breeding systems and breeding objectives.
3. Understand the methods of fruit crop improvement through introduction, selection, hybridization, mutation breeding, polyploidy breeding and root-stock breeding.
4. Hypothesize the role of bio-technology in fruit breeding and resistance breeding for biotech and abiotic stresses of fruit crops.

Course Content (Theory)**Unit I****9 hours**

Origin and distribution, Taxonomical status of species and cultivars. Cytogenetics and genetic resources.

Unit II**8 hours**

Blossom biology, breeding objectives, systems and ideotypes. Crop improvement through introduction, selection, hybridization, mutation breeding.

Unit III**7 hours**

Polyploid breeding and rootstock breeding. Improvement of quality traits. Resistance breeding for biotic and abiotic stresses.

Unit IV**6 hours**

Biotechnological interventions, achievements and future thrust. The important temperate, sub-tropical and tropical fruit crops will be covered.

TransactionMode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Commercial Production of Loose Flowers

Course Code: FSC555

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the student will be able to:

1. Learn thoroughly about production and post-harvest management of loose flowers.
2. Develop the required skills on commercial production management.
3. Identify deficiency symptoms of nutrients in loose flower crops.
4. Acquaint with the preparation of land and production technology for cultivation of loose flower crops

Course Content (Theory)

Scope and scenario: Scope, scenario and importance of loose flowers, constraints and opportunities in loose flower production. Growing environment: Nursery management, pro-tray nursery under shade nets, soil and climate requirement, Field preparation,

systems of planting. Crop management: Soil analysis, soil health card, water and nutrient management, weed management, training and pruning, special horticultural practices such as pinching and disbudding, use of growth regulators, physiological disorders and remedies, INM,

IPM and IDM. Crop regulation: Flower forcing and year-round flowering, production for special occasions through physiological interventions and chemical regulation.

Unit-I**8 hours**

Flower Crops-

Rose, Jasmine, Chrysanthemum, Marigold, Tuberose, China aster,

Unit-II**7 hours**

Flower Crops- Crossandra, Gaillardia, Spider lily, Hibiscus, Nerium,

Unit-III**7 hours**

Flower Crops-

Barleria, Celosia, Gomphrena, Madar (Calotropis gigantea), Nyctanthes (Harsingar),

Unit-IV**8 hours**

Flower Crops- Tabernaemontana (Chandni), Lotus, Water lily, Michelia (Champa), Gardenia, Ixora and Balsam.

Course Title: Production Technology of warm season Vegetable Crops
Course Code: VSC2551

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Identify deficiency symptoms of nutrients in warm season vegetable Crops
 2. Acquaint with production technology of warm season vegetable crops
- Gain practical knowledge for nursery raising technique and preparation of land for cultivation and for warm season vegetable crops.
- Compile about crops for raising quality, disease, pest and harvesting induces of warm season vegetable crops.

CourseContent(Theory)

Introduction, commercial and nutritional importance, origin and distribution, botany and taxonomy, area, production, productivity and constraints, soil requirements, climatic factors for yield and quality, commercial varieties/ hybrids, seed rate and seed treatment, raising of nursery including grafting technique, sowing/ planting time and methods, precision farming, cropping system, nutritional including micronutrients and irrigation requirements, intercultural operations, special horticultural practices namely hydroponics, aeroponics, weed control, mulching, role of plant growth regulators, physiological disorders, maturity indices, harvesting, yield, post-harvest management (grading, packaging and marking), pest and disease management and economics of crops.

Unit-I**8hours**

Vegetable crops—Tomato, Brinjal, Hot pepper, Sweet pepper and Okra.

Unit-II**8hours**

Vegetable crops-
Beans; French bean, Indian bean, Cluster bean and Cowpea.

Unit-III**7hours**

Vegetable crops-
Cucurbits; Cucumber, Melons, Gourds, Pumpkin and Squashes.

Unit-IV**7hours**

Vegetable crops- Tuber crops; Sweet potato, Elephant foot yam, Tapioca, Taro and yam and Leafy vegetables; Amaranth and Drumstick.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

**Course Title: Production Technology of warm season
Vegetable Crops lab**
Course Code: VSC2552

L	T	P	Credits
0	0	2	1

Total Hours-30

Course content (Practical)

1. Scientific raising of nursery and seed treatment.
2. Sowing and transplanting.
3. Description of commercial and hybrid varieties.
4. Demonstration on methods of irrigation, fertilizers and micronutrients application.
5. Mulching practices and weed management.
6. Use of plant growth substances in warm season vegetable crops.
7. Study of nutritional and physiological disorders.
8. Studies on hydroponics, aeroponics and other soilless culture.
9. Identification of important pests and diseases and their control.
10. Preparation of cropping scheme for commercial farms.
11. Visit to commercial farm, greenhouse/polyhouse etc.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- Swarup, V. 2006. *Vegetable Science and Technology in India*: Kalyani Publishers, India. Pp 656.

Course Title: Fundamentals of**Computer Applications****Lab****Course Code: CA551**

L	T	P	Credits
0	0	4	2

Total Hours-60

Learning Outcomes: After completion of this course, the learner will be able to:

1. Learn and understand about basics of MS-Word, Excel, and preparation of Graphs.
2. Read, understand, and interpret material on technology. They will have an appreciation for some of the ideas, issues, and problems involved in writing about technology and in workplace writing.
3. Understand the operating systems, peripheral devices, networking, multimedia and internet.
4. Familiarize with basic sources and methods of research and documentation on topics in technology, including on-line research.

Course Content (Practical)

1. MS-word: creating a document, saving and editing, use of options from tool bars, format, insert and tools (spelling and grammar),
2. Alignment of text, creating a table, merging cells, column and row width. Ms-excel:
3. Entering expressions through the formula toolbar and use of inbuilt functions, sum, average, max, min.
4. Creating graphs and saving with and without data in Ms-excel.
5. MS-access: creating database, structuring with different types of fields.
6. MS-powerpoint: preparation of slides on powerpoint.
7. Internet Browsing: browsing a web page and creating of E-Mail ID. Agri. net (ARIS).

Suggested Readings:

- Salaria, R. S. 2017. *Computer Fundamentals*. Daryaganj, New Delhi. pp. 486.
- Manish, S. and Bhatt, A. 2016. *Computers in Agriculture: Fundamentals and Applications*. New India Publishing Agency. New Delhi. pp. 190.
- Manjunath, B. E. 2010. *Computer Basics*. Vasan Publications, Bengaluru, Karnataka. Pp. 356.

Course Title: Basic Concepts in Laboratory Techniques (Lab)

Course Code: PGC551

L	T	P	Credits
0	0	2	2

Learning Outcomes: After completion of this course, the learner will be able to:

To acquaint the students about the basics of commonly used techniques in laboratory.

Preparation of solutions of acids

Use of burettes, pipettes, measuring cylinders, flasks, separatory funnel, condensers, micropipettes and vaccumets, washing, drying and sterilization of glassware

Drying of solvents/chemicals

Weighing and preparation of solutions of different strengths and their dilution

Handling techniques of solutions; Preparation of different agro-chemical doses in field and pot applications.

Preparation of solutions of acids

Neutralisation of acid and bases

Preparation of buffers of different strengths and pH values

Use and handling of microscope, laminar flow, vacuum pumps, viscometer, thermometer, magnetic stirrer, micro-ovens, incubators, sand bath, water bath, oil bath.

Electric wiring and earthing. Preparation of media and methods of sterilization

Seed viability testing, testing of pollen viability Tissue culture of crop plants; Description of flowering plants in botanical terms in relation to taxonomy.

Transaction Mode

Lecture, Seminar, Peer Group Discussion, Self-Learning, Collaborative Learning and

Cooperative Learning

Suggested Reading

Furr AK. 2000. CRCH and Book of Laboratory Safety. CRC Press.

Gabb MH & Lat chem. WE. 1968. A Handbook of Laboratory Solutions. Chemical Publ.

Co.

Course Title: Seminar**Course Code: FSC557**

L	T	P	Credits
-	-	-	1

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Show competence in identifying relevant information, defining and explaining topics under discussion
2. Present the classical and innovative work related to plant pathology subject.
3. Reach across diverse disciplines to apply theories, methods and knowledge bases from multiple fields to a single question or problem
4. Judge when to speak and how much to say, speak clearly and audibly in a manner appropriate to the subject

Course Title: Master Research**Course Code: FSC500**

L	T	P	Credits
-	-	-	7

Learning Outcomes: After completion of this course, the learner will be able to:

1. Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques.
2. Familiarize with Negotiate, plan, design and execute a research-based project.
3. Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format.
4. Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of plant pathology experiments.

Semester-III**Course Title: Growth and Development of Fruit Crops**

L	T	P	Credits
2	0	0	2

Course Code: FSC600**Total Hours-30****Learning Outcomes:** After completion of this course, the learner will be able to:

1. Understand the growth and development dynamics, parameters morphogenesis, effect of light, temperature, water and mineral nutrients on growth and development.

2. Get acquainted with knowledge of annual and semi-perennial fruit crops, assimilate partitioning during growth and development.

3. Learn the basics of biosynthesis and role of growth regulator on growth and development along with uses and importance of dormancy.

4. Develop the concept of juvenility, vegetative to reproductive inter phase, flowering, pollination, fertilization, fruit set, fruit growth, ripening, seed development and stress physiology.

Course Content (Theory)**Unit I****10 hours**

Parameters of growth and development. Growth dynamics and morphogenesis. Annual, Biennial and perennial fruit crops. Effect of light and temperature. Assimilate partitioning during growth and development.

Unit II**7 hours**

Effect of water and mineral nutrition. Biosynthesis and role of growth promoters and inhibitors.

Unit III**8 hours**

Physiology of dormancy, bud break, juvenility, vegetative to reproductive inter phase, flowering, pollination, fertilization, fruit set, fruit drop, fruit growth, ripening and seed development.

Unit IV**5 hours**

Growth and developmental processes during stress. Impact of pruning, training and chemical manipulations in fruit crops.

Transaction Mode

Lecture, Mobile Teaching, Self-

Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Bhatnagar P. 2017. *Physiology of Growth and Development of Horticultural Crops*. Agrobios (India).
- Buchanan B, Gruissem W and Jones R. 2002. *Biochemistry and Molecular Biology of Plants*. John Wiley & Sons, NY, USA.
- Dhillon W S and Bhatt Z A. 2011. *Fruit Tree Physiology*. Narendra Publishing House, New Delhi.
- Durner E. 2013. *Principles of Horticultural Physiology*. CAB International. Horticultural Sciences–Fruit Science 295
- Epstein E. 1972. *Mineral Nutrition of Plants: Principles and Perspectives*. John Wiley & Sons, NY, USA.

Course Title: Propagation and nursery management of fruit crops

Course Code: FSC603

L	T	P	Credits
1	0	0	1

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Understand the plant life cycle, cellular basis of propagation, Asexual and sexual propagation, chimeras, apomixes etc.
2. Attain the knowledge of seed germination factors affecting and hormonal control of seed germination, seedling growth, seed quality packing and storing of seed.
3. Learn the importance of rootstocks, rooting of cuttings and anatomical

- d
physiological basis.
4. Acquire the basic knowledge about establishment of budwood bank, stock, scion, interstock relationship and incompatibility.

Course Content (Theory)

Unit I**7 hours**

Introduction, life cycles in plants, cellular basis for propagation. Sexual propagation-apomixis, polyembryony, chimeras.

Unit II**8 hours**

Factors influencing seed germination and seedling growth, Seed quality, treatment, packing, storage, certification and testing. Rooting of cuttings under mist and hot beds.

Unit III**7 hours**

Physiological, anatomical and biochemical aspects of root induction in cuttings. Selection of elite mother plants. Establishment of bud wood bank. Stock, scion and inter stock relationship and Incompatibility. Uses of dwarfing rootstocks. Rejuvenation. Progeny orchard and scion bank.

Unit IV**8 hours**

Micro-Propagation-in vitro clonal propagation, direct organogenesis, embryogenesis, micro grafting and meristem culture. Hardening, packing and transport of micro- propagules. Nursery structures.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Hartman, H. T., Kester, D. E., Davies, F. T. and Geneve, R. L. 2015. *Plant propagation principles and practices*. Pearson Education India. pp. 928.
- Sandhu, M. K. 2020. *Plant Propagation*. New age international Ltd. pp. 296.
- Sharma, R. R. 2019. *Propagation of Horticultural crops*. Kalyani Publishers. pp. 304

Course Title: Growth and Development of Fruit Crops Lab

Course Code: FSC602

L	T	P	Credits
0	0	2	1

Course content (Practical)**Total Hours-30**

1. Understanding dormancy mechanisms in fruit crops and seed stratification.
2. Techniques of growth analysis.
3. Practical use of growth regulators.
4. Understanding ripening phenomenon in fruits.
5. Study on impact of physical manipulations on growth and development.
6. Study on chemical manipulations on growth and development.

7. Understanding stress impact on growth and development.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Bhatnagar P. 2017. *Physiology of Growth and Development of Horticultural Crops*. Agrobios (India).
- Buchanan B, Gruissem W and Jones R. 2002. *Biochemistry and Molecular Biology of Plants*. John Wiley & Sons, NY, USA.

Course Title: Propagation and nursery management of fruit crops lab
Course Code: FSC604

L	T	P	Credits
0	0	2	1

Course content (Practical)**Total Hours-30**

1. Hands on practices on rooting of dormant and summer cuttings.
2. Anatomical studies in rooting of cutting and graft union.
3. Hands on practices on various methods of budding

4. Hands on practices on various methods of grafting.
5. Propagation by layering and stooling.
6. Visit to commercial tissue culture laboratories and accredited nurseries.

Transaction Mode

Lecture, Mobile Teaching, Self-

Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Hartman, H. T., Kester, D. E., Davies, F. T. and Geneve, R. L. 2015. *Plant propagation principles and practices*. Pearson Education India. pp. 928.

Course Title: Technical writing and communication skills lab
Course Code: PGC600

L	T	P	Credits
0	0	4	2

Total Hours-60

Learning Outcomes: After completion of this course, the learner will be able to:

1. Understand and know how to follow the stages of the writing process (prewriting/writing/rewriting).
2. Apply them to technical and workplace writing tasks.
3. Produce a set of documents related to technology and writing in the workplace and will have improved their ability to write clearly and accurately.
4. Develop the concepts about basic components of definitions, descriptions, process explanations, and other common forms of technical writing.

Course Content

Various forms of scientific writings: theses, technical papers, review, manuals etc., various parts of thesis and research communications: title page, authorship contents page, preface, introduction, review of literature, material and methods, experimental results and discussion; writing of abstracts, summaries, precise, citations etc. commonly used abbreviations in the theses and research communications; illustrations, photographs and drawings with suitable captions; paginations, numbering of tables and illustrations; writing of numbers and dates

in scientific write-ups; editing and proof reading; writing a review article, access methods.

Suggested readings:

- *Day, R.A. and Gastel, B. 2011. How to Write and Publish a Scientific Paper, 7th Edition. Greenwood Press, United States. pp. 300.*

- *Laplane, P.A. 2011. Technical Writing: A Practical Guide for Engineers and Scientists. CRC Press, London. pp. 250.*
- *Greenlaw, R. 2012. Technical Writing, Presentational Skills and Online Communication: Professional Tools and Insights. Idea Group, U.S. pp. 247.*

Course Title: Master Research

Course Code: FSC500

L	T	P	Credits
-	-	-	9

Learning Outcomes: After completion of this course, the learner will be able to:

1. Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques.
2. Familiarize with Negotiate, plan, design and execute a research-based project.
3. Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format.
4. Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of plant pathology experiments.

Semester-IV

Course Title: Nutrition of Fruit Crops

L	T	P	Credit
---	---	---	--------

Course Code: FSC651

			s
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Know the importance and various types of nutrients and their uptake mechanisms.
2. Analyse soil and plant status with respect to various nutrients.
3. Make use of corrective measures to overcome deficiency or toxicity.
Recognize the significance of essential nutrient elements, their natural resource, fertilizers and physiological role in plant, determination of nutrient from soil and plant.

.

Course Content (Theory)**Unit I****7 hours**

General Concepts and Principles: Importance and history of nutrition in fruit crops, essential plant nutrients, factors affecting plant nutrition; nutrient uptake and their removal from soil.

Unit II

7 hours

Diagnostics, Estimation and Application: Nutrient requirements, root distribution in fruit crops and fertilizer use efficiency. Methods and techniques for evaluating the requirement of macro- and micro-elements, Diagnostic and interpretation techniques including DRIS.

Unit III

8 hours

Role of different macro and micro-nutrients, their deficiency and toxicity disorders, corrective measures to overcome deficiency and toxicity disorders.

Unit IV

8 hours

Integrated Nutrient Management (INM): Fertigation in fruit crops, bio-fertilizers and their use in INM systems.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Atkinson D, Jackson JE and Sharples RO. 1980. *Mineral Nutrition of Fruit Trees*. Butterworth–Heinemann.
- Bould C, Hewitt EJ and Needham P. 1983. *Diagnosis of Mineral Disorders in Plants Vol. 1 Principles*.
- Her Majesty's Stationery Office, London. Cooke GW. 1972. *Fertilizers for maximizing yield*. Grenada Publishing Ltd, London.
- Epstein E. 1972. *Mineral Nutrition of Plants: Principles and Perspectives*. Wiley Eastern Ltd
- Kanwar JS. 1976. *Soil Fertility-Theory and Practice*. ICAR, New Delhi.

- Tandon HLS. 1992. *Management of Nutrient Interactions in Agriculture. Fertilizer Development and Consultation Organization*, New Delhi.
- Westerman RL. 1990. *Soil Testing and Plant Analysis*, 3rd Ed. Soil Science Society of America, Inc., Madison, WI.
- Yawalkar KS, Agarwal JP and Bokde S. 1972. *Manures and Fertilizers*. 3rd Ed. Agri Horticultural Publishing House, Nagpur.

Course Title: Nutrition of Fruit Crops Lab**Course Code: FSC652**

L	T	P	Credits
0	0	2	1

Course content (Practical)**Total Hours-30**

1. Visual identification of nutrient deficiency symptoms in fruit crops.
2. Identification and application of organic, inorganic and bio-fertilizers.
3. Soil/tissue collection and preparation for macro- and micro-nutrient analysis.
4. Analysis of soil physical and chemical properties - pH, EC, Organic carbon.
5. Determination of N, P, K and other macro- and micronutrients.
6. Fertigation in glasshouse and field grown horticultural crops.
7. Preparation of micro-nutrient solutions, their spray and soil applications.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings

Course Title: Intellectual Property and its management in Agriculture
Course Code: PGC651

L	T	P	Credits
1	0	0	1

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

1. Recognize the importance of IP and to educate the pupil on basic concepts of Intellectual Property Management in Agriculture.
2. Identify the significance of practice and procedure of Patents.
3. Make the students to understand the statutory provisions of different forms of Intellectual Property Management in simple forms.
4. Establish the procedure of obtaining Patents, Copyrights, Trade Marks & Industrial Design

Course Content

Unit-I

4 hours

Historical perspectives and need for the introduction of Intellectual Property Right regime; TRIPs and various provisions in TRIPs Agreement; Intellectual Property and Intellectual Property Rights (IPR).

Unit-II

4 hours

Benefits of securing IPRs; Indian Legislations for the protection of various types of Intellectual Properties; Fundamentals of patents, copyrights, geographical indications, designs and layout, trade secrets and traditional knowledge, trademarks. Protection of plant varieties and farmers' rights and biodiversity protection.

Unit-III

4 hours

Protection of plant varieties and farmers' rights and biodiversity protection; Protectable subject matters, protection in biotechnology, protection of other biological materials, ownership and period of protection; National Biodiversity protection initiatives; Convention on Biological Diversity.

Unit-IV

3 hours

International Treaty on Plant Genetic Resources for Food and Agriculture; Licensing of technologies, Material transfer agreements, Research collaboration Agreement, License Agreement.

Suggested readings:

- *Erbisch F Hand Maredia K. 1998. Intellectual Property Rights in Agricultural*
- *Biotechnology. CABI.*

- Ganguli P. 2001. *Intellectual Property Rights: Unleashing Knowledge Economy*. McGraw-Hill.
- *Intellectual Property Rights: Key to New Wealth Generation*. 2001. NRDC and Aesthetic Technologies.
- Ministry of Agriculture, Government of India. 2004. *State of Indian Farmer*. Vol. V. Technology Generation and IPRI Issues. Academic Foundation.
- Rothschild Mand Scott N. (Ed.). 2003. *Intellectual Property Rights in Animal Breeding and Genetics*. CABI.
- Saha R. (Ed.). 2006. *Intellectual Property Rights in NAM and Other Developing Countries: A Compendium on Law and Policies*. Daya Publ. House

Course Title: Master Research

Course Code: FSC500

L	T	P	Credits
-	-	-	12

Learning Outcomes: After completion of this course, the learner will be able to:

1. Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical Techniques
 2. Familiarize with Negotiate, plan, design and execute a research-based project.
 3. Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format
- Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of plant pathology experiments
