

GURU KASHI UNIVERSITY

M.Sc. Entomology

Session: 24-25

Department of Entomology

Graduate Attributes

1. Comprehend the principles and methodologies used in Entomology. Acquaint themselves about external morphology of the insect's body, *i.e.*, head, thorax and abdomen, their appendages and functions.
2. Familiarize the students with principles of insect pest management, including concept and philosophy of integrated pest management (IPM).
3. Train the students with theory and practice of biological control, mass production techniques and field evaluation of various biological control agents like parasitoids, predators and various entomo-pathogenic microorganisms.
4. Impart knowledge to the students on basic aspects of anatomy of different systems, elementary physiology and adaptation of different system of insects according to habits and habitats of the insects.
5. Utilize the concepts of ecology and basic principles of distribution.
6. To provide basic information about molecular aspects.
7. Train students in sampling methodology, calculation of diversity indices, constructing life tables, and relating insect population fluctuations to biotic and abiotic factors.
8. Develop comprehension relevant to the basic concepts of toxicology, types of insecticides and their formulations along with pesticide residue management and plant protection appliances and quarantine aspects along with its application.
9. Appraise the students of advanced techniques in handling of different bio agents, modern methods of biological control and scope in cropping system-based pest management in agro ecosystems.
10. To impart knowledge to students about beneficial insects- honeybees, silkworm and lac insects.

Program Learning Outcomes

1. Estimate and evaluate methods of population estimation of insect pests in various agro ecosystems.
2. Apply taxonomic keys in correct identification of insect's characterization and classify insect pests of economic importance.
3. Create expertise in the identification, ecology, life history of insect pests, physiological aspects and basic principles and strategies in the management of insect pests.
4. Explore for entrepreneurship development.
5. Aspects related to pesticide residue management according to latest developments.

Programme Structure						
Course Code	Course Title	Type of Course	(Hours Per Week)			Total Credits
			L	T	P	
Semester I						
MEN101	Insect Morphology	Major	2	0	0	2
MEN103	Insect Morphology Lab	Major	0	0	2	1
MEN102	Insect Ecology	Major	1	0	0	1
MEN104	Insect Ecology Lab	Major	0	0	2	1
MPP301	Biological Control of Plant Diseases	Minor (CBCS)	2	0	0	2
MPP303	Post Harvest Diseases	Minor (CBCS)				
MPP 302	Biological Control of Plant Diseases Lab	Minor (CBCS)	0	0	2	1
MPP304	Post Harvest Diseases Lab	Minor (CBCS)

- **NC- Non Credit**

Evaluation Criteria for Theory Courses

A. Continuous Assessment: [25 Marks]

Continuous Assessment 1: [10 Marks]

Continuous Assessment 2: [10 Marks]

Continuous Assessment 3: [05 Marks]

B. Mid Semester Test: [30 Marks]

C. End-Term Exam: [40 Marks]

D. Attendance: [5 Marks]

For the CAs the teacher shall take surprised test/term paper/quiz/assignments

Evaluation Criteria for practical Courses

- ❖ The syllabus of subject is divided into five experiments, each experiment marks is of 20 marks (10 lab performance, 5 viva, 5 lab record)- Total marks 100

Evaluation Criteria for Seminar

- ❖ It is of total Marks-100
 - Collection of review of literature - 20marks
 - Data Analysis -30 marks
 - Power Point Presentation skills - 30 marks
 - Discussion - 20 marks

Evaluation Criteria for Master Research

- ❖ The evaluation is Satisfactory or Unsatisfactory on the basis of the performance of the candidate.

Semester I**Course Title: Insect Morphology****Course Code: MEN101**

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Collect insect fauna and their identification up to family level.
- 2 Classification of the insects on basis of different orders.
- 3 Study importance of common names and technical names of insects in agriculture
- 4 Understand and apply rules of zoological nomenclature for better understanding of phylogeny of insects

Course Contents (Theory)**Unit-I****8hours**

External Morphology: Insect body wall structure, cuticular outgrowths, colouration and special integumentary structures in insects, body tagmata, sclerites and segmentation. Head- Origin, structure and modification; compound eyes, mouthparts, antennae, their types and functioning; tentorium and neck sclerites.

Unit-II**8hours**

Thorax- Areas and sutures of tergum, sternum and pleuron, pterothorax; wings: structure and modifications, venation, wing coupling apparatus and mechanism of flight; legs: structure and modifications. Abdomen Segmentation and appendages; genitalia and their modifications; embryonic and post-embryonic development.

Unit-III**7hours**

Insect sense organs (mechano-, photo- and chemo- receptors); organogenesis at pupal stage; insect defense; chaetotaxy; morphological traits in relation to forensic entomology.

Unit-IV**7hours**

Types of immature stages in insect orders, morphology of egg, nymph/ larva and pupa, identification of different immature stages of crop pests and stored product insects. Comparative study of life history strategies in hemi-metabola

and holometabola, immature stages as ecological and evolutionary adaptations, significance of immature stages for pest management.

Course Title: Insect Morphology Lab

Course Code: MEN103

L	T	P	Credits
0	0	2	1

Course Content (Practical)

30 hours

- Preparation of permanent mounts of different body parts and their appendages of taxonomic importance including male and female genitalia
- Dissection of genitalia. Types of immature stages in insects; their Collection, rearing and preservation
- Identification of immature insects to orders and families, in endopterygote orders, viz., Diptera, Lepidoptera, Hymenoptera and Coleoptera using key

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Reading

- Evans JW. 2004. *Outlines of Agricultural Entomology*. Asiatic Publ., New Delhi.
- Gillott C. 1995. *Entomology, 2nd Ed.* Plenum Press, New York, London.
- Richards OW and Davies RG. 1977. *Imm's General Text Book of Entomology*. 10th Ed. Chapman and Hall, London.
- Tembhore DB. 2000. *Modern Entomology*, Himalaya Publishing House, Mumbai.
-

Course Title: Insect Ecology

Course Code: MEN102

L	T	P	Credits
1	0	0	1

Total Hours -15

Learning Outcomes: On successful completion of this course, the students will able to:

- 1 Impart knowledge on ecological significance of feeding guilds in phytophagous insects.

- 2 Develop a module for identification of different ways by which insects may defend themselves against predators and parasites.
- 3 Analyze the sampling techniques for population estimations.

Course Content

Unit-I

5hours

History and definition. Basic Concepts. Organisation of the Biological world. Plato's Natural Balance vs Ecological Dynamics as the modern view. Abundance and diversity of insects, Estimates and Causal factors. Study of abundance and distribution and relation between the two. Basic principles of abiotic factors and their generalised action on insects. Implications for abundance and distribution of organisms including insects- Law of the Minimum, Law of Tolerance, and biocoenosis, Systems approach to ecology.

Unit-II

4hours

Basic concepts of abundance- Model vs Real world. Population growth basic models- Exponential vs Logistic models. Discrete vs Continuous growth models. Concepts of Carrying capacity, Environmental Resistance and Optimal yield. Vital Statistics Life Tables and their application to insect biology. Survivorship curves. Case studies of insect life tables. Population dynamics- Factors affecting abundance Environmental factors, dispersal and migration, Seasonality in insects. Classification and mechanisms of achieving different seasonality- Diapause (Quiescence) –aestivation, hibernation.

Unit-III

3hours

Biotic factors- Food as a limiting factor for distribution and abundance, Nutritional Ecology. Food chain- web and ecological succession. Interspecific interactions- Basic factors governing the interspecific interactions- Classification of interspecific interactions – The argument of cost-benefit ratios. Competition- Lotka-Volterra model, Concept of niche ecological homologues, competitive exclusion. Evolution of mimicry, colouration, concept of predator satiation; evolution of life history strategies.

Unit-IV

3 hours

Community ecology- Concept of guild, Organisation of communities- Hutchinson Ratio, May's d/w, Relation between the two and their association with Dyar's Law and Przibram's law. Relative distribution of organisms, Concept of diversity- the Wallacian view. Assessment of diversity. Diversity- stability debate, relevance to pest management. Pest management as applied ecology. Climate change and insect pest/natural enemy population; ecological engineering.

Course Title: Insect Ecology Lab**Course Code: MEN104**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Types of distributions of organisms and demonstration of field sampling.
- Methods of sampling insects, estimation of densities of insects and understanding the distribution parameters- Measures of central tendencies, Poisson distribution, Negative Binomial Distribution
- Determination of optimal sample size. Learning to fit basic population growth models and testing the goodness of fit
- Fitting Holling's Disc equation
- Assessment of prey-predator densities from natural systems and understanding the correlation between the two
- Assessing and describing niche of some insects of a single guild
- Calculation of niche breadth, activity breadth and diagrammatic representation of niches of organisms
- Calculation of diversity indices- Shannon's, Simpson's and Avalanche Index and understanding their associations and parameters that affect their values
- Problem solving in ecology. Field visits to understand different ecosystems and to study insect occurrence in these systems

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning

Suggested Reading

- Begon M, Townsend CR and Harper JL. 2006. *Ecology: From Individuals to Ecosystems*. 4th Ed. Blackwell Publishing, USA/ UK/ Australia.
- Chapman JL and Reiss MJ. 2006. *Ecology: Principles and Applications*. 2nd Ed. Cambridge Univ. Press, Cambridge.
- Fowler J, Cohen L and Jarvis P. 1998. *Practical Statistics for Field Biology*. 2nd Ed. John Wiley & Sons, Chichester, West Sussex PO19 8SQ, England.
- Gotelli NJ and Ellison AM. 2004. *A Primer of Ecological Statistics*. Sinauer Associates, Inc., Sunderland, MA

Course Title: Agriculture statistics**Course Code: MAR121**

L	T	P	Credits
3	0	0	3

Total Hours-45

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Enumerate statistical principles apply in all the areas of experimental work
- 2 Recognize the requirement at the national level and farm level for agriculture policy making,
- 3 Get familiarize with decision making, agriculture development and estimates agriculture and national income
- 4 Discover the importance of statistics in agriculture, helps to ascertain the volume of crop that needs to be produced based on output and demand of previous year

Course Content

Unit I

10hours

Frequency distribution, standard error and deviation, correlation and regression analyses, co-efficient of variation; Hypothesis testing.

Unit II

15hours

Concept of p-value. Tests of significance-t, F and chi-square (X^2); Data transformation and missing plot techniques.

Unit III

15hours

Design of experiments and their basic principles, completely randomized, randomized block, split plot, strip-plot, factorial and simple confounding designs.

Unit IV

5hours

Efficiency of designs; Methods of statistical analysis for cropping systems including intercropping; Pooled analysis.

Course Title: Agriculture statistics Lab**Course Code: MAR122**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 Hours**

- Correlation analysis. Regression analysis (exponential, power function, quadratic, multi-variate, selection of variables, validation of models, ANOVA and testing of hypothesis).
- Tests of significance (Z-test, t-test, F-test and Chi-square test). Analysis of variance.
- Completely randomized design.
- Randomized block and latin square designs.
- Missing plot and analysis of covariance.
- 24 and 33 simple and confounded experiments.
- Split plot designs. Factorial in split plot designs.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring

Suggested readings:

- Panse, V.G. and Sukhatme, P.V. 1954. *Statistical methods for agricultural workers*. Pp. 361.
- Gupta, S.C. and Kapoor, V.K. 2014. *Fundamentals of Mathematical Statistics*. Sultan Chand & Sons, New Delhi.pp. 0.
- Snedecor, G.W. and Cochran, W.G. 1989. *Statistical Methods*, 8th Edition. Wiley-Blackwell. Pp.524.
- Rangaswamy, R. 2016. *Textbook of Agricultural Statistics*. *New Age International (P) Ltd.* New Delhi. pp. 531.

Course Title: Biological Control of Plant Disease**Course Code: MPP301**

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 To study principles and application of ecofriendly and sustainable management strategies of plant diseases
- 2 Study of virulence analysis and genetic diversity
- 3 Acquire knowledge about disease distribution, symptomatology, etiology, epidemiology and control

- 4 Understand the description of important phytopathogenic genera
- 5 Study about identification of fungal cultures and biocontrol agents

Course Content

Unit I

7hours

Concept of biological control, definitions, importance, principles of plant disease management with bioagents, history of biological control, merits and demerits of biological control.

Unit II

7hours

Types of biological interactions, competition: mycoparasitism, exploitation for hypovirulence, rhizosphere colonization, competitive saprophytic ability, antibiosis, induced resistance, mycorrhizal associations, operational mechanisms and its relevance in biological control.

Unit III

11hours

Factors governing biological control, role of physical environment, agroecosystem, operational mechanisms and cultural practices in biological control of pathogens, pathogens and antagonists and their relationship, biocontrol agents, comparative approaches to biological control of plant pathogens by resident and introduced antagonists, control of soil-borne and foliar diseases. Compatibility of bioagents with agrochemicals and other antagonistic microbes.

Unit IV

9hours

Commercial production of antagonists, their delivery systems, application and monitoring, biological control in IDM, IPM and organic farming system, biopesticides available in market. Quality control system of biocontrol agents.

Course Title: Biological Control of Plant Diseases Lab

Course Code: MPP302

L	T	P	Credits
0	0	2	1

Course Content

30 hours

- Isolation, characterization and maintenance of antagonists, methods of study of antagonism and antibiosis, application of antagonists against pathogen in-vitro and in vivo conditions;
- Preparation of different formulations of selected bioagents and their mass production;
- Quality parameters of biocontrol agents;
- One week exposure visit to commercial biocontrol agents production unit.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Readings

- 1.** *Campbell R. 1989. Biological Control of Microbial Plant Pathogens. Cambridge Univ. Press, Cambridge.*
- 2.** *Cook RJ and Baker KF. 1983. Nature and Practice of Biological Control of Plant Pathogens. APS, St. Paul, Minnesota.*
- 3.** *Fokkema MJ. 1986. Microbiology of the Phyllosphere. Cambridge Univ. Press, Cambridge.*
- 4.** *Gnanamanickam SS (Eds). 2002. Biological Control of Crop Diseases. CRC Press, Florida.*

Course Title: Post Harvest Diseases

Course Code: MPP303

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Comprehend methods of post harvest technology and its role in providing better quality produce to the consumer.
- 2 Understand functional foods and nutraceuticals Understand utilization of the produce and methods for shelf-life extension.
- 3 Learn quality control and various standards required for domestic and export market
- 4 Interpret the feasibility of implementing integrated disease management programs (IDMP) in agricultural crops
- 5 Acquire knowledge about management of post harvest diseases

Course Content

Unit I

5hours

Concept of post-harvest diseases, definitions, importance with reference to management and health, principles of plant disease management as pre-

arvest and post-harvest, Types of post-harvest problems both by biotic and abiotic factors.

Unit II

9 hours

Role of physical environment, agro-ecosystem leading to quiescent infection, operational mechanisms and cultural practices in perpetuation of pathogens, pathogens and antagonist and their relationship, role of biocontrol agents and chemicals in controlling post-harvest diseases, comparative approaches to control of plant pathogens by resident and introduced antagonists

Unit III

5 hours

Integrated approaches in controlling diseases and improving the shelf life of produce using nutritional, bio-control agents and other agents, control of aflatoxigenic and mycotoxigenic fungi, application and monitoring for health hazards.

Unit IV

10 hours

Study of symptoms, toxicosis of various pathogens, knowledge of Codex Alimentarius for each product and commodity. Physical and biological agents/practices responsible for development/ prevention of post-harvest diseases traditional and improved practices.

Course Title: Post Harvest Diseases Lab

Course Code: MPP304

L	T	P	Credits
0	0	2	1

Course Content (Practical)

30 hours

- Isolation, characterization and maintenance of important post-harvest pathogens.
- Role of different storage conditions for disease development.
- Application of antagonists against pathogens under in vitro and in vivo conditions.
- Comparative efficacy of different chemicals, fungicides, phyto-extracts and bioagents.

Transaction Mode

, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

1. Narayanasamy, P. 2005. *Postharvest Pathogens and Disease Management*. John Wiley & Sons, New Jersey, United States. Pp. 672.
2. Singh, D., Sharma, R.R., Devappa, V. and Kamil, D. 2021. *Postharvest Handling and Diseases of Horticultural Produce*. CRC Press. London. Pp.454.
3. Snowden, A.L. 1992. *Post-Harvest Diseases and Disorders of Fruits and Vegetables. Volume 2: Vegetables* CRC Press, London. Pp. 642.

Course Title: Library and Information services Lab
Course Code: MAR125

L	T	P	Credits
0	0	4	2

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Identify library services and availability of resources in order to develop a realistic overall plan for research
- 2 Use general information resources to increase familiarity with the topic and disciplinary vocabulary
Learn about the research topic, question or thesis to achieve a manageable focus appropriate to the assignment criteria, available resources, and evidence needed to support thesis
- 3 Identify keywords, synonyms and related terms in order to flexibly Effective search

Course Content

- Introduction to Library and its services; five laws of library science; type of documents;
- Classification and cataloguing; organization of documents;
- Sources of information primary, secondary and tertiary;
- Current awareness and SDI services; tracing information from reference sources;

- Library survey; preparation of bibliography; use of Online Public Access Catalogue;
- Use of CD-ROM databases and other computerized library services, CeRA,
- J-Gate; use of Internet including search engines and its resources; e-resources.

Suggested readings:

1. Gita, S. 2012. *Library and Information Services*. LAP Lambert Academic Publishing. USA. pp. 76.
2. Kishore, A. 2021. *A Conceptual approach to library and information science A complete self study guide. 2nd edition*. AKB Publication. Jaipur. pp. 250

Course Title: AGRICULTURAL RESEARCH, RESEARCH ETHICS AND RURAL DEVELOPMENT PROGRAMMES

Course Code: MAR134

Total Hours-30

L	T	P	Credits
2	0	0	2

Learning Outcomes:

On successful completion of this course, the students will able to:

1. Identify library services and availability of resources in order to develop a realistic overall plan for research
2. Use general information resources to increase familiarity with the topic and disciplinary vocabulary
3. Learn about the research topic, question or thesis to achieve a manageable focus appropriate to the assignment criteria, available resources, and evidence needed to support thesis
4. Identify keywords, synonyms and related terms in order to flexibly

UNIT I

9 hours

History of agriculture in brief; Global agricultural research system: need, scope, opportunities; Role in promoting food security, reducing poverty and protecting the environment; National Agricultural Research Systems (NARS) and Regional Agricultural Research Institutions; Consultative Group on International Agricultural Research (CGIAR); International Agricultural Research Centres (IARC), partnership with NARS, role as a partner in the global agricultural research system, strengthening capacities at national and regional levels; International fellowships for scientific mobility.

UNIT II

7 hours

Research ethics: research integrity, research safety in laboratories, welfare of animals used in research, computer ethics, standards and problems in research ethics.

UNIT III**7****hours**

Concept and connotations of rural development, rural development policies and strategies. Rural development programmes: Community Development Programme, Intensive Agricultural District Programme, Special group – Area Specific Programme

UNIT**IV****7 hours**

Integrated Rural Development Programme (IRDP) Panchayati Raj Institutions, Co-operatives, Voluntary Agencies/ Non-Governmental Organisations. Critical evaluation of rural development policies and programmes. Constraints in implementation of rural policies and programmes.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

1. Bhalla GS and Singh G. 2001. Indian Agriculture - Four Decades of Development. Sage Publ.
2. Punia MS. Manual on International Research and Research Ethics. CCS Haryana Agricultural University, Hisar.
3. Rao BSV. 2007. Rural Development Strategies and Role of Institutions - Issues, Innovations and Initiatives. Mittal Publ.

Course Title: Master Research**Course Code: MEN100**

L	T	P	Credits
NA	NA	NA	5 NC

Learning Outcomes:

On successful completion of this course, the students will be able to:

- 1 Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques
- 2 Negotiate, plan, design and execute a research-based project,
- 3 Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format
- 4 Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of entomology experiments

Semester II

Course Title: Anatomy and Physiology of Insects
Course Code: MEN201

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Identify different layers of insect's exoskeleton and their composition and functioning.
- 2 Describe the male and female reproductive systems of insects and identification the internal and external structures associated with each sex.
- 3 Possess knowledge about the major parts of an insect's head capsule, including sclerites, sutures, and appendages.
- 4 Understand the structure and functioning of insect mouthparts and their evolution.

Course Contents**Unit-I****18hours**

Scope and importance of insect physiology; physiology of integument, moulting, chemistry of cuticle, biosynthesis of chitin

Unit-II**8hours**

Growth, hormonal control, metamorphosis and diapause; pheromone secretion, transmission, perception and reception.

Unit-III**8hours**

Physiology and mechanism of digestion, circulation, respiration, excretion, reproduction, secretion (exocrine and endocrine glands) and nerve impulse transmission in insects.

Unit-IV**6hours**

Importance of insect nutrition- role of vitamins, proteins, amino acids, carbohydrates, lipids, minerals and other food constituents; extra and intra-cellular microorganisms and their role in physiology; artificial diets.

Course Title: Anatomy and Physiology of Insects Lab**Course Code: MEN205**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Determination of chitin in insect cuticle;
- Examination and count of insect haemocytes; preparation and evaluation of various diets;
- Consumption, utilization and digestion of natural and artificial diets.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Reading

- Chapman RF. 1998. *Insects: Structure and Function*. ELBS Ed., London.
- Duntson PA. 2004. *The Insects: Structure, Function and Biodiversity*. Kalyani Publishers, New Delhi.
- Gullan PJ and Cranston PS. 2000. *The Insects: An Outline of Entomology*, 2nd Ed. Blackwell Science, UK.
- Patnaik BD. 2002. *Physiology of Insects*. Dominant Publishers, New Delhi.

Course Title: Insect Taxonomy**Course Code: MEN202**

L	T	P	Credits
1	0	0	1

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

1. To sensitize the students on the theory and practice of classifying organisms (with special reference to animals) and the rules governing the same.
2. To introduce the students to the classification of insects up to the level of families
3. Hands-on experience in identifying the families of insects with an emphasis on the practical aspects.
4. Ability to properly collect, preserve and label insect specimens

Course Content

Unit I

3 hours

History of insect classification; principles of systematics and its importance. Identification, purpose, methods character matrix, taxonomic keys. Descriptions subjects of descriptions, characters, nature of characters, analogy v/s homology, parallel v/s convergent evolution, intraspecific variation in characters, polythetic and polymorphic taxa, sexual dimorphism.

Unit-II

4 hours

Brief evolutionary history of insects introduction to phylogeny of insects and Classification of Superclass Hexapoda –Classes – Ellipura (Collembola, Protura), Diplura and Insecta- and the Orders contained. International Code of Zoological Nomenclature, Phylocode, its brief explanation and uses. Process of speciation and interbreeding allopatric species. Molecular systematics, DNA barcoding, karyological and biochemical approaches in taxonomy. Insect labeling protocols and procedures.

Unit-III

4 hours

Distinguishing characters, general biology, habits and habitats of insect orders and economically important families contained in them. Collembola, Protura, Diplura. Class Insecta: Subclass Apterygota – Archaeognatha, Thysanura. Subclass: Pterygota, Division Palaeoptera – Odonata and Ephemeroptera. Division: Neoptera: Subdivision: Orthopteroid and Blattoid Orders (=Oligoneoptera: Plecoptera, Blattodea, Isoptera, Mantodea, Grylloblattodea, Dermaptera, Orthoptera, Phasmatodea, Mantophasmatodea, Embioptera, Zoraptera), Subdivision: Hemipteroid Orders (=Paraneoptera): Psocoptera, Phthiraptera, Thysanoptera and Hemiptera.

Unit-IV

4 hours

Distinguishing characters, general biology, habits and habitats of insect orders and economically important families contained in them (Continued). Division

Neoptera –Subdivision Endopterygota, Section Neuropteroid- Coleopteroid Orders: Strepsiptera, Megaloptera, Raphidioptera, Neuroptera and Coleoptera, Section Panorpid Orders Mecoptera, Siphonaptera, Diptera, Trichoptera, Lepidoptera, and Section Hymenopteroid Orders: Hymenoptera.

Course Title: Insect Taxonomy Lab**Course Code: MEN206**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Study of Orders of insects and their identification using taxonomic keys
- Keying out families of insects of different major Orders: Odonata, Orthoptera, Blattodea, Mantodea, Isoptera, Hemiptera, Thysanoptera, Phthiraptera, Neuroptera, Coleoptera, Diptera, Lepidoptera and Hymenoptera;
- Field visits to collect insects of different orders.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Reading

- CSIRO 1990. *The Insects of Australia: A Text Book for Students and Researchers*. 2nd Ed. Vols. I and II, CSIRO. Cornell Univ. Press, Ithaca.
- Freeman S and Herron JC. 1998. *Evolutionary Analysis*. Prentice Hall, New Delhi.
- Gullan PJ and Cranston PS. 2010. *The Insects: An outline of Entomology*. 4th Ed. Wiley-Blackwell Publications, West Sussex, UK.
- Mayr E. 1971. *Principles of Systematic Zoology*. Tata McGraw Hill, New Delhi.
- Richards OW and Davies RG. 1977. *Imm's General Text Book of Entomology*. 10th Ed. Chapman and Hall, London.

Course Title: Biological Control of Insect Pests And Weeds**Course Code: MEN203**

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Appraise the students about potential of useful insects in agricultural pest management
- 2 Acquaint with economic importance of different categories of insects
- 3 Evaluate efficacy of various bio pest control agents
- 4 Do mass production of natural enemies of pest insects

Course Content**Unit-I****9hours**

History, principles and scope of biological control; important groups of parasitoids, predators and pathogens; principles of classical biological control-importation, augmentation and conservation. History of insect pathology, infection of insects by bacteria, fungi, viruses, protozoa, rickettsiae, spiroplasma and nematodes.

Unit-II**7 hours**

Biology, adaptation, host seeking behaviour of predatory and parasitic groups of insects. Role of insect pathogenic nematodes, viruses, bacteria, fungi, protozoa, etc., their mode of action. Biological control of weeds using insects. Epizootiology, symptomatology and etiology of diseases caused by the above and the factors controlling these. Defense mechanisms in insects against pathogens.

Unit-III**8hours**

Mass production of quality bio-control agents- techniques, formulations, economics, field release/ application and evaluation. Development of insectaries, their maintenance.

Unit-IV**6hours**

Successful biological control projects, analysis, trends and future possibilities of biological control. Importation of natural enemies- Quarantine regulations, biotechnology in biological control. Semiochemicals in biological control.

Course Title: Biological Control of Insect Pests And Weeds Lab

Course Code: MEN207

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Identification of common natural enemies of crop pests (parasitoids, predators, microbes) and weed killers
- Visits to bio-control laboratories to learn rearing and mass production of egg, egg-larval, larval, larval-pupal and pupal parasitoids, common predators, microbes and their laboratory hosts, phytophagous natural enemies of weeds
- Field collection of parasitoids and predators. Hands-on training in culturing, identification of common insect pathogens. Quality control and registration standards for biocontrol agents.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- *Burges, H.D. and Hussey, N.W. (Eds). 1971. Microbial Control of Insects and Mites. Academic Press, London.*
- *De Bach, P. 1964. Biological Control of Insect Pests and Weeds. Chapman & Hall, New York.*
- *Dhaliwal, G.S. and Arora, R. 2001. Integrated Pest Management: Concepts and Approaches. Kalyani Publ., New Delhi.*
- *Gerson, H. and Smiley, R.L. 1990. Acarine Biocontrol Agents – An Illustrated Key and Manual. Chapman & Hall, New York.*

Course Title: Host Plant Resistance**Course Code: MEN204**

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: After completion of this course, the learner will be able to:

- 1 Impart knowledge on the sources of resistant plants to insect pest.
- 2 Learn about various factors affecting plant resistance to insects.

- 3 Apply various techniques of plant resistance to insect pest
- 4 Acquaint with the breeding techniques for insect resistance in crops.

Course Content

Unit-I

4hours

History and importance of resistance; principles, classification, components, types and mechanisms of resistance. Insect-host plant relationships; theories and basis of host plant selection in phytophagous insects.

Unit-II

4hours

Chemical ecology, tritrophic relations, volatiles and secondary plant substances; basis of resistance. Induced resistance – acquired and induced systemic resistance.

Unit-III

4hours

Screening techniques; breeding for insect resistance in crop plants; exploitation of wild plant species; gene transfer, successful examples of resistant crop varieties in India and world.

Unit-IV

3hours

Factors affecting plant resistance including biotypes and measures to combat them. Role of biotechnology in plant resistance to insects.

Course Title: Host Plant Resistance

Course Code: MEN208

L	T	P	Credits
0	0	2	1

Course Content (Practical)

30 hours

- Screening techniques for measuring resistance
- Measurement of plant characters and working out their correlations with plant resistance
- Testing of resistance in important crops
- Bioassay of plant extracts of susceptible/ resistant varieties
- Demonstration of antibiosis, tolerance and antixenosis

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- Dhaliwal, G.S. and Singh, R. (Eds). 2004. *Host Plant Resistance to Insects – Concepts and Applications*. Panima Publ., New Delhi.
- Maxwell, F.G. and Jennings, P.R. (Eds). 1980. *Breeding Plants Resistant to Insects*. John Wiley & Sons, New York.
- Smith, C.M. 2005. *Plant Resistance to Arthropods – Molecular and Conventional Approaches*. Springer, Berl

Course Title: Fundamentals of Computer Applications Lab
Course Code: MAR206

L	T	P	Credits
0	0	4	2

Total Hours-60

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Learn and understand about basics of MS-Word, Excel, preparation of Graphs
- 2 Read, understand, and interpret material on technology. They will have an appreciation for some of the ideas, issues, and problems involved in writing about technology and in workplace writing.
- 3 Understand the operating systems, peripheral devices, networking, multimedia and internet
- 4 Familiarize with basic sources and methods of research and documentation on topics in technology, including on-line research.

Course Content (Practical)

60 hours

- Ms-word: creating a document, saving and editing, use of options from tool bars, format, insert and tools (spelling and grammar)
- Alignment of text, creating a table, merging cells, column and row width.
- Ms-excel: entering expressions through the formula tool bar and use of inbuilt functions, sum, average, max, min.
- Creating graphs and saving with and without data in Ms-excel.
- Ms-access: creating database, structuring with different types of fields.
- Ms-power point: preparation of slides on power point.

- Internet Browsing: browsing a web page and creating of E-Mail ID. Agri. net (ARIS).

Suggested Readings:

- *Salaria, R.S. 2017. Computer Fundamentals. Daryaganj, New Delhi. pp. 486.*
- *Manish, S. and Bhatt, A. 2016. Computers in Agriculture: Fundamentals and Applications. New India Publishing Agency. New Delhi. pp. 190.*
- *Manjunath, B.E. 2010. Computer Basics. Vasan Publications, Bengaluru, Karnataka. pp. 356*

Course Title: Seminar I

Course Code: MEN206

L	T	P	Credits
0	0	1	1

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Show competence in identifying relevant information, defining and explaining topics under discussion
- 2 Present the classical and innovative work related to entomology subject.
- 3 Reach across diverse disciplines to apply theories, methods and knowledge bases from multiple fields to a single question or problem
- 4 Judge when to speak and how much to say, speak clearly and audibly in a manner appropriate to the subject

Course Content

Seminar topic will be suggested by faculty

Course Title: BASIC CONCEPTS IN LABORATORY TECHNIQUES

Course Code: MAR207

L	T	P	Credits
0	0	2	1

Objective

To acquaint the students about the basics of commonly used techniques in laboratory.

Practical

- Safety measures while in Lab;
- Handling of chemical substances;

- Use of burettes, pipettes, measuring cylinders, flasks, separatory funnel, condensers, micropipettes and vaccupets;
- Washing, drying and sterilization of glassware;
- Drying of solvents/ chemicals;
- Weighing and preparation of solutions of different strengths and their dilution;
- Handling techniques of solutions;
- Preparation of different agro-chemical doses in field and pot applications;
- Preparation of solutions of acids;
- Neutralisation of acid and bases;
- Preparation of buffers of different strengths and pH values;
- Use and handling of microscope, laminar flow, vacuum pumps, viscometer, thermometer, magnetic stirrer, micro-ovens, incubators, sandbath, waterbath, oilbath;
- Electric wiring and earthing;
- Preparation of media and methods of sterilization;
- Seed viability testing, testing of pollen viability;
- Tissue culture of crop plants;
- Description of flowering plants in botanical terms in relation to taxonomy.

Suggested Readings

1. Furr AK. 2000. *CRC Hand Book of Laboratory Safety*. CRC Press.
2. Gabb MH and Latchem WE. 1968. *A Handbook of Laboratory Solutions*. Chemical Publ. Co.

Course Title: Master Research

Course Code: MEN100

L	T	P	Credits
NA	NA	NA	5NC

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques
- 2 Negotiate, plan, design and execute a research-based project,
- 3 Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format

- 4 Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of entomology experiments

Semester III

Course Title: Toxicology of Insecticide

Course Code: MEN301

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Recognize the major classes of insecticide and understand their mode of action
- 2 Demonstrate the various processes involved in toxic dynamics of insecticides
- 3 Get awareness regarding the limitations of insecticide use such as resistance, safe use of pesticide residue and environmental contamination
- 4 Develop a basic understanding on performing insect bioassays

Course Content

Unit-I

6 hours

Definition and scope of insecticide toxicology; history of chemical control; pesticide use and pesticide industry in India. Insecticide Act, registration procedures, label claim, and quality control of insecticides; safe use of insecticides; diagnosis and treatment of insecticide poisoning.

Unit-II

10hours

Classification of insecticides and acaricides based on mode of entry, mode of action and chemical nature; categorization of insecticides on the basis of toxicity – criteria for bees, beneficial insects and other insects in general; structure and mode of action of organochlorines, organophosphates, carbamates, pyrethroids, tertiaryamines, neonicotinoids, oxadiazines, phenyl pyrozoles, insect growth regulators, microbials, botanicals, new promising compounds/ new insecticide molecules; nanopesticides; drawbacks of insecticide abuse.

Unit-III

8hours

Principles of toxicology; evaluation of insecticide toxicity; joint action of insecticides synergism, potentiation and antagonism; factors affecting toxicity of

insecticides; insecticide compatibility, selectivity and phytotoxicity. bioassay definition, objectives, criteria, factors, problems and solutions.

Unit-IV

6hours

Insecticide metabolism; insect-pest resistance to insecticides; mechanisms and types of resistance; insecticide resistance management and pest resurgence. Insecticide residues, their significance and environmental implications; procedures of insecticide residue analysis.

Course Title: Toxicology of Insecticide

Course Code: MEN303

L	T	P	Credits
0	0	2	1

Course Content (Practical)

30 hours

- Insecticide formulations and mixtures
- Laboratory and field evaluation of bio-efficacy of insecticides
- Bioassay techniques
- Evaluation of insecticide toxicity
- Toxicity to beneficial insects
- Pesticide appliances
- Working out doses and concentrations of pesticides

Transaction Mode

Learning Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative

Suggested readings

- Gupta, H.C.L. 1999. *Insecticides: Toxicology and Uses*. Agrotech Publ., Udaipur.
- Ishaaya, I. and Degheele, (Eds.). 1998. *Insecticides with Novel Modes of Action*. Narosa Publ. House, New Delhi.
- Matsumura, F. 1985. *Toxicology of Insecticides*. Plenum Press, New York.
- Prakash, A. and Rao, J. 1997. *Botanical Pesticides in Agriculture*. Lewis Publ., New York.

Course Title: Apiculture

Course Code: MEN302

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: After completion of this course, the learner will be able to:

1. Learn about production, processing and utilization of various hive products.
2. Understand the role of different insects as pollinators of crops
3. The course will be useful for providing self-employment to the learner

Course Content

Unit-I

3hours

Historical development of apiculture at global level and in India; Classification of bees; global distribution of genus *Apis* and races; Morphology and anatomy of honey bee; Honey bee biology, ecology, adaptations; Honey bee behaviour – nest founding, comb construction, brood care, defense, other in-house and foraging activities; Bee pheromones; Honey bee communication.

Unit-II

4hours

Commercial beekeeping as an enterprise; Design and use of bee hives; Apicultural equipment; Seasonal bee husbandry; Honey bee nutrition and artificial diets; Absconding, swarming, drifting – causes and management; Curbing drone rearing; Laying worker menace – causes, signs and management.

Unit-III

4hours

Bee genetics; Principles and procedures of bee breeding; Screening of honey bee colonies; Techniques in mass queen bee rearing; Mating nuclei and their establishment; Selective mating; Queen bee management; Bee packages. Honey – composition, properties, crystallization, post-harvest handling and processing; Honey quality standards and assessment; Apicultural diversification –potential and profitability; Production/ collection of bee pollen, propolis, royal jelly, bee venom and bees wax and their post-harvest handling; Apitherapy; Value addition of hive products; Development of apiculture project.

Unit-IV**4hours**

Ecto parasitic and endo parasitic bee mites – biology, ecology, nature and symptoms of damage, management tactics; Wax moths, wasps and ants – biology, ecology, nature and symptoms of damage, management tactics; Predatory birds, their damage potential and management tactics; Pesticide poisoning to honey bees, signs and protection; Protocols in evaluation of pesticide toxicity to honey bees. Non-Apis pollinators, their augmentation and conservation; Role of bee pollinators in augmenting crop productivity; Managed bee pollination of crops.

Course Title: Apiculture Lab**Course Code: MEN306**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Morphological characteristics of honey bee
 - Mouthparts; digestive, respiratory and reproductive adaptations in different castes of honey bees
 - Recording of colony performance
 - Seasonal bee husbandry practices
 - Swarming, queenlessness, laying workers menaces, etc. and their remedies
 - Innovative techniques in mass queen bee rearing; selection and breeding of honey bees
 - Production technologies for various hive products
 - Bee enemies and diseases and their management
 - Recording pollination efficiency
 - Application of various models for determining pollination requirement of crop
- Preparation of bee floral chart

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings

- Abrol DP and Sharma D. 2009. *Honey Bee Mites and Their Management*. Kalyani Publishers, New Delhi, India.

- Abrol DP. 2009. *Honey bee Diseases and Their Management*. Kalyani Publishers, New Delhi, India.
- Abrol DP. 2010. *Beekeeping: A Compressive Guide to Bees and Beekeeping*. Scientific Publishers, India

Course Title: Sericulture

Course Code: MEN304

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: On successful completion of this course, the students will be able to:

1. Rearing of silk worms for production of silk and start entrepreneurship.
2. Acquire knowledge about latest techniques of rearing in Silkworm.
3. Get hands-on training on Silkworm rearing and Silk reeling

Course Content

Unit I

4hours

History of Sericulture, importance, organizations involved in sericulture activities, silkworm types, distribution, area and silk production.

Mulberry species, ecological requirements, cultivation, improved varieties, propagation methods, sapling production, planting and pruning techniques; pest and diseases, management strategies; intercropping, water and weed management. Food plants of eri silkworm, castor cultivation, intercultural operations, nutrient and water management; method of harvest; host plants of Tasar, nursery and cultivation, selection of seed, soaking and heap making, pruning techniques. Food plants of Muga silkworm, Som and Soalu propagation methods; nursery techniques; intercultural operations and weed management.

Unit II

4hours

Silkworm origin – classification based on voltinism, moultnism, geographical distribution and genetic nature – pure races –multivoltine and bivoltine races – cross breeds – bivoltine hybrids –Races and hybrids of mulberry, eri, tasar and muga silkworm- Morphology and biology of silkworm, sex limited characters anatomy of digestive and excretory systems of larva; structure and function of silk glands.

Unit III

4hours

Rearing house, types, disinfection, room and bed disinfectants; egg incubation methods, Chawki rearing, feeding, cleaning and spacing; rearing of late age worms, feeding, cleaning, spacing and moulting care; mountages, cocoon harvesting and marketing; pests and diseases of silkworms and their management.

Unit IV**3hours**

Post cocoon technology, stifling, cocoon cooking, brushing, reeling, re-reeling, bleaching, degumming, dyeing, printing and weaving, different reeling machines; value addition in sericulture; economics of sericulture.

Course Title: Sericulture**Course Code: MEN305**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Morphology of mulberry plants
 - Identification of popular mulberry genotypes
 - Nursery bed and main field preparation
 - Planting methods
 - Identification of nutrient deficiency symptoms
 - Identification of weeds
 - Pruning and harvesting methods
 - Identification of pests and diseases of mulberry– Terminalia arjuna, Terminalia tomentosa, Som and Soalu- Nursery and pruning techniques – Intercultural operations
 - Morphology of silkworm – Identification of races – Dissection of mouth parts and silk glands – Disinfection techniques – rearing facilities – silkworm rearing – feeding, cleaning and spacing – Identification of pests and diseases of mulberry silkworm – hyperparasitoids and mass multiplication techniques – silkworm egg production technology –Mulberry and Eri silkworms – rearing methods–pests and diseases of non-mulberry silkworms
- Visit to grainage, cocoon market and silk reeling centre – Economics of silkworm rearing.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- Dandin SB and K Giridhar. 2014. *Hand book of Sericulture Technologies*. Central Silk Board, Bangalore, 4p.
- Govindaiah G, VP, Sharma DD, Rajadurai S and Nishita V Naik. 2005. *A text book on mulberry crop protection*. Central Silk Board, Bangalore. 450 p

Course Title: Epidemiology and Forecasting of Plant Diseases**Course Code: MPP403**

L	T	P	Credits
2	0	0	2

Learning Outcomes: After completion of this course, the learner will be able to:

- 1 Catalogue and Understand the biotic and abiotic causes of plant diseases for the study of Growth, reproduction, survival and dispersal of important plant pathogens.
- 2 Assess the concept of host parasite interaction, recognition concept and infection.
- 3 Recognize the biofertilizers, disease development, role of enzymes, toxins, growth regulators to identify the disease.
- 4 Acquaint about defense strategies and altered plant metabolism as affected by plant pathogens.

Course Content**Unit I**

Epidemic concepts, simple interest and compound interest disease, Historical development. Elements of epidemics and their interaction. Structures and patterns of epidemics. Modelling, system approaches and expert systems in plant pathology.

Unit II

Genetics of epidemics. Models for development of plant disease epidemics. Common and natural logarithms, function fitting, area under disease progress curve and correction factors, inoculum dynamics. Population biology of pathogens, temporal and spatial variability in plant pathogens.

Unit III

Epidemiological basis of disease management. Survey, surveillance and vigilance. Remote sensing techniques and image analysis. Crop loss assessment.

Unit IV

Principles and pre-requisites of forecasting, systems and factors affecting various components of forecasting, some early forecasting and procedures based on weather and inoculum potential, modelling disease growth and disease prediction. Salient features of important forecasting models.

** • The visit to Flowerdale, Shimla, CSIR- Institute of Microbial Technology (IMTECH), Chandigarh and National Bureau of Plant Genetic Resources (NBPGR), New Delhi visit need to including in study scheme for practical exposure of Students.

Transaction Mode

Lecture, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested Reading:

1. Campbell CL and Madden LV. 1990. *Introduction to Plant Disease Epidemiology*. John Wiley & Sons, New York.
2. Cooke B, Jones DM and Gereth KB. 2018 *The Epidemiology of Plant Diseases*. Springer Publications.
3. Cowling EB and Horsefall JG. 1978. *Plant Disease*. Vol. II. Academic Press, New York.
4. Laurence VM, Gareth H and Frame Van den Bosch (Eds.). *The Study of Plant Disease Epidemics*. APS, St. Paul, Minnesota.
5. Nagarajan S and Murlidharan K. 1995. *Dynamics of Plant Diseases*. Allied Publ., New Delhi.
6. Thresh JM. 2006. *Plant Virus Epidemiology*. *Advances in Virus Research* 67, Academic Press, New York.

Course Title: Plant Quarantine and Regulations

Course Code: MPP205

L	T	P	Credits
2	0	0	2

Total Hours-30

Learning Outcomes: After completion of this course, the learner will be able to:

- 1 Obtain knowledge on the principles and the role of plant quarantine at national and international level.
- 2 Absorb about the quarantine restrictions in the movement of agricultural produce, seeds and planting material; case histories of exotic pests/diseases and their status.
- 3 Categorize about plant protection organization in India, acts related to registration of pesticides and transgenics.
- 4 Learn about the history of quarantine legislations, PQ order 2003, environmental acts,
- 5 Formulate Industrial registration; APEDA, import and export of bio-control agents.

Course Content

Unit I

15hours

Historical development in plant quarantine, Definitions of pest, and transgenics as per Govt. notification; Organizational set up of plant quarantine in India. Relative importance; quarantine – domestic and international. Quarantine restrictions in the movement of agricultural produce, seeds and planting material; case histories of exotic pests/ diseases and their status.

Unit II

10hours

Acts related to registration of pesticides and transgenics. History of quarantine legislations, Salient features of PQ Order 2003. Environmental Acts, Industrial registration; APEDA, Import and Export of bio-control agents.

Unit III

8hours

Identification of pest/ disease free areas; contamination of food with toxigens, microorganisms and their elimination; Symptomatic diagnosis and other techniques to detect pest/ pathogen infestations; VHT and other safer techniques of disinfection/ salvaging of infected material.

Unit IV

12hours

WTO regulations; non-tariff barriers; Pest risk analysis, good laboratory practices for pesticide laboratories; pesticide industry; Sanitary and Phytosanitary measures. Visit to plant quarantine station and PEQ facilities.

Transaction Mode

e-Team Teaching, e-Tutoring, Lecture, Seminar, Dialogue, Peer Group Discussion

Suggested readings:

1. Kahn, R. 1988. *Plant Protection & Quarantine*. CRC Press, Boca Raton, Florida, United States. Pp. 248.
2. Ebbels, D.L. 2003. *Principles of Plant health & quarantine*. Central Science Laboratory, York, UK. Pp. 228.
3. Mehrotra, R.S. 2011. *Plant Pathology*, McGraw Hill Education, New York, United States. Pp. 910.

Course Title: Technical writing and communication skills

Course Code: MAR304

L	T	P	Credits
0	0	2	1

Learning Outcomes:

On successful completion of this course, the students will able to:

- 1 Understand and know how to follow the stages of the writing process (prewriting/writing/rewriting) and
- 2 Apply them to technical and workplace writing tasks
- 3 Produce a set of documents related to technology and writing in the workplace and will have improved their ability to write clearly and accurately
- 4 Understand the basic components of definitions, descriptions, process explanations, and other common forms of technical writing

Course Content

Unit I

3 hours

Various forms of scientific writings: theses, technical papers, review, manuals etc., various parts of thesis and research communications: title page, authorship contents page, preface.

Unit II

4 hours

Introduction, review of literature, material and methods, experimental results and discussion;

Unit III

4 hours

Writing of abstracts, summaries, citations etc.

Unit IV

4 hours

Commonly used abbreviations in the theses and research communications; illustrations, photographs and drawings with suitable captions; paginations, numbering of tables and illustrations; writing of numbers and dates in scientific write-ups; editing and proof reading; writing a review article, access methods.

Suggested readings:

- Day, R.A. and Gastel, B. 2011. *How to Write and Publish a Scientific Paper, 7th Edition*. Greenwood Press, United States. pp. 300.
- Laplante, P.A. 2011. *Technical Writing: A Practical Guide for Engineers and Scientists*. CRC Press, London. pp. 250.
- Greenlaw, R. 2012. *Technical Writing, Presentational Skills and Online Communication: Professional Tools and Insights*. Idea Group, U.S. pp

Course Title: Master Research

Course Code: MEN100

L	T	P	Credits
NA	NA	NA	9NC

Learning Outcomes:

- 1 Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques
- 2 Negotiate, plan, design and execute a research-based project,
- 3 Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format
- 4 Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of entomology experiments
- 5 Familiarize with indexing databases, citation databases: web of science, scopus, etc.

Semester IV

Course Title: Post Harvest Entomology

Course Code: MEN401

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Study extent of losses in stored grains and their products.
- 2 Diagnose various types of pest(insects and non-insects) problems in

stored conditions

- 3 Disseminate preventive and curative measures of pest management in stored grains.
- 4 Study the importance of sanitation and other non-chemical methods of pest control

Course Content

Unit-I

4hours

Introduction, history of storage entomology, concepts of storage entomology and significance of insect pests. Post-harvest losses into vis-à-vis total production of food grains in India. Scientific and socio-economic factors responsible for grain losses. Concept of seed vault.

Unit-II

4 hours

Important pests namely insects, mites, rodents, birds and microorganisms associated with stored grain and field conditions including agricultural products; traditional storage structures; association of stored grain insects with fungi and mites, their systematic position, identification, distribution, host range, biology, nature and extent of damage, role of field and cross infestations and natural enemies, type of losses in stored grains and their effect on quality including biochemical changes.

Unit-III

4hours

Ecology of insect pests of stored commodities/ grains with special emphasis on role of moisture, temperature and humidity in safe storage of food grains and commodities. Stored grain deterioration process, physical and biochemical changes and consequences. Grain storage- types of storage structures i.e., traditional, improved and modern storage structures in current usage. Ideal seeds and commodities' storage conditions.

Unit-IV

3hours

Important rodent pests associated with stored grains and their non-chemical and chemical control including fumigation of rat burrows. Role of bird pests and their management. Control of infestation by insect pests, mites and microorganisms. Preventive measures- Hygiene/ sanitation, disinfestations of stores/ receptacles, legal methods. Curative measures- Non-chemical control measures- ecological, mechanical, physical, cultural, biological and engineering. Chemical control prophylactic and curative- Characteristics of pesticides, their use and precautions in their handling with special emphasis on fumigants.

Insecticide resistance in stored product pests and its management; recent advances (MAS, PPP, HS) in storage pest management; integrated approaches to stored grain pest management.

Course Title: Post Harvest Entomology Lab

Course Code: MEN402

L	T	P	Credits
0	0	2	1

Course Content (Practical)

30 hours

- Collection, identification and familiarization with the stored grains/ seed insect pests and nature of damage caused by them
- Detection of hidden insect infestation in stored food grains
- Estimation of uric acid content in infested produce; estimation of losses in stored food grains
- Determination of moisture content in stored food grains
- Familiarization of storage structures, demonstration of preventive and curative measures including fumigation techniques
- Treatment of packing materials and their effect on seed quality
- Field visits to save grain campaign, central warehouse and FCI warehouses

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- Hall DW. 1970. *Handling and Storage of Food Grains in Tropical and Subtropical Areas*. FAO. Agricultural Development Paper No. 90 and FAO, Plant Production and Protection Series No. 19, FAO, Rome.
- Jayas DV, White NDG and Muir WE. 1995. *Stored Grain Ecosystem*. Marcel Dekker, New York.
- Khader V. 2004. *Textbook on Food Storage and Preservation*. Kalyani Publishers, New Delhi.

Course Title: Insect Vectors of Plant Pathogens

Course Code: MEN403

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes: On successful completion of this course, the students will be able to:

- 1 Learn typical features of insect vectors of plant pathogens
- 2 Understand significance of insect vectors vis-à-vis other pest insects of plants
- 3 Check potential of insect vectors in spreading crop diseases
- 4 Analyze the feasibility of implementing integrated disease management programs (IDMP) in agricultural crops and feasibility of using vector management as part of IDMP.

Course Content**Unit-I****4 hours**

History of developments in the area of insects as vectors of plant pathogens. Important insect vectors and their characteristics; mouth parts and feeding processes of important insect vectors. Efficiency of transmission.

Unit-II**4hours**

Transmission of plant viruses and fungal pathogens. Relation between viruses and their vectors.

Unit-III**4 hours**

Transmission of plant viruses by aphids, whiteflies, mealy bugs and thrips. Transmission of mycoplasma and bacteria by leaf hoppers and plant hoppers.

Unit-IV**3 hours**

Transmission of plant viruses by psyllids, beetles and mites. Epidemiology and management of insect transmitted diseases through vector management.

Course Title: Insect Vectors of Plant Pathogens

Course Code: MEN404

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Identification of common vectors of plant pathogens- aphids, leafhoppers, whiteflies, thrips, beetles, nematodes
- Rearing and handling of vectors;

- Demonstration of virus transmission through vectors- aphids, leafhoppers and whiteflies
- Estimating vector transmission efficiency, studying virus-vector relationship.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Suggested readings:

- Basu AN. 1995. *Bemisia tabaci* (Gennadius) – Crop Pest and Principal Whitefly Vector of Plant Viruses. Oxford and IBH, New Delhi.
- Harris KF and Maramorosch K. (Eds.). 1980. *Vectors of Plant Pathogens*. Academic Press, London.
- Maramorosch K and Harris KF. (Eds.). 1979. *Leafhopper Vectors and Plant Disease Agents*. Academic Press, London

Course Title: Principles of Acarology

Course Code: MEN405

L	T	P	Credits
1	0	0	1

Total Hours-15

Learning Outcomes:

On successful completion of this course, the students will be able to:

1. To acquaint the students with external morphology of different groups of predatory and phytophagous mites
2. Train in identification of commonly occurring families of plant associated mites
3. Provide information about important pests of crops and predatory mites
4. Provide information about their management

Course Content

Unit-I

4 hours

History of Acarology; importance of mites as a group; habitat, collection and preservation of mites. Soil arthropod mites and their classification, habitats and their identification.

Unit-II

4 hours

Introduction to morphology and biology of mites and ticks. Broad classification major orders and important families of Acari including diagnostic characteristics.

Unit-III**4 hours**

Estimation of populations; sampling and extraction methods for soil arthropods. Economic importance, seasonal occurrence, nature of damage, host range of mite pests of different crops, mite pests in polyhouses, mite pests of stored products and honeybees.

Unit-IV**3 hours**

Management of mites using acaricides, phytoseiid predators, fungal pathogens, etc. Culturing of phytophagous, parasitic and predatory mites. Mode of action of acaricides, resistance of mites and ticks to acaricides, its management.

Course Title: Principles of Acarology**Course Code: MEN406**

L	T	P	Credits
0	0	2	1

Course Content (Practical)**30 hours**

- Collection of mites from plants, soil and animals
- Extraction of mites from soil, plants and stored products
- Preparation of mounting media and slide mounts
- External morphology of mites
- Identification of mites up to family level using key and management of mites

Suggested readings:

- Anderson JM and Ingram JSI. 1993. *Tropical Soil Biology and Fertility: A Handbook of Methods*. CABI, London.
- Chhillar BS, Gulati R and Bhatnagar P. 2007. *Agricultural Acarology*. Daya Publ. House, New Delhi.
- Dindal DL. 1990. *Soil Biology Guide*. A Wiley-InterScience Publ., John Wiley and Sons, New York.
- Gerson U and Smiley RL. 1990. *Acarine Biocontrol Agents – An Illustrated Key and Manual*. Chapman and Hall, New York.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Course Title: Intellectual Property and its management in Agriculture**Course Code: MAR402**

L	T	P	Credits
1	0	0	1

Total Hours-30**Learning Outcomes:** After completion of this course, the learner will be able to:

1. To equip students and stakeholders
2. Knowledge of Intellectual Property Rights (IPR) related protection systems,
3. Significance and use of IPR as a tool for wealth and value creation in a knowledge-based economy.
4. Licensing of technologies, Material transfer agreements, Research collaboration Agreement, License Agreement.

Course Content**Unit-I****3 hours**

Historical perspectives and need for the introduction of Intellectual Property Right regime; TRIPs and various provisions in TRIPS Agreement; Intellectual Property and Intellectual Property Rights (IPR), benefits of securing IPRs.

Unit-II**4 hours**

Indian Legislations for the protection of various types of Intellectual Properties; Fundamentals of patents, copyrights, geographical indications, designs and layout, trade secrets and traditional knowledge, trademarks.

Unit-III**4 hours**

Protection of plant varieties and farmers' rights and biodiversity protection; Protectable subject matters, protection in biotechnology, protection of other biological materials, ownership and period of protection.

Unit-IV**4 hours**

National Biodiversity protection initiatives; Convention on Biological Diversity; International Treaty on Plant Genetic Resources for Food and Agriculture; Licensing of technologies, Material transfer agreements, Research collaboration Agreement, License Agreement.

Suggested readings:

- *Erbisch FH and Maredia K. 1998. Intellectual Property Rights in Agricultural Biotechnology. CABI.*
- *Ganguli P. 2001. Intellectual Property Rights: Unleashing Knowledge Economy. McGraw-Hill.*
- *Intellectual Property Rights: Key to New Wealth Generation. 2001. NRDC and Aesthetic Technologies*

Course Title: Master Research**Course Code: MEN100****Learning Outcomes:**

L	T	P	Credits
NA	NA	NA	11NC

- 1 Conduct an investigation and solve scientific problems using a range of methods, and apply appropriate and/or theoretical techniques
- 2 Negotiate, plan, design and execute a research-based project,
- 3 Analyse data and provide a written report or thesis on the methodology and outcomes in an appropriate format
- 4 Learn the methodology of planning, layout, data recording, analysis, interpretation and report writing of entomology experiments
- 5 Familiarize with indexing databases, citation databases: web of science, scopus, etc.
